2070VG-12	12'

Description- Our belted conveyors are configured to convey a wide range of materials. We use 2" end pulleys set close to the ends allowing smooth transfers for small or irregular shaped items. These conveyors are designed primarily to be used in shrink packaging lines. We can configure them with adjustable or fixed guides, photosensors, pushers, belt cleats, casters, and other options. Please note that these conveyors ship ready to go; simply unwrap them and plug them in.

Assembly- All above conveyors ship assembled with belt tracked, controls mounted, and floor stands mounted and adjusted.

Power- 110V AC input / 90V DC drive

Speed- Belt speeds are variable 6-60 fpm unless otherwise specified

Load- Carrying capacity is 100 lbs. total weight on conveyor. Heavy duty and incline conveyors also available

Length- Additional lengths available up to 40 feet

Width- Additional belt widths available. Overall bed width is belt width plus 2.5".

Height- Height is set for 30" belt to floor with 12" of adjustment. Other heights available at no additional charge

Options- Guide rails, casters, pushers, sensors, and other add-on equipment.

Guides- Stock guides are painted steel and are intended for one time set up. Value Guide type guides are black plastic with steel and plastic guides. They are adjustable in, out, up, and down and are suited for frequent adjustments.

Reversing- Conveyors can be reversed with an optional controller and center drive

Lead time- Standard conveyors ship in 3 to 4 weeks, additional time may be required for others

Freight- Shipping costs are not included in price.

***Terms: Net 30 from date of invoice**
