

COREWRAP®

Simple — Innovative — Proven

Our CoreWrap® shrink packaging process eliminates the problems of:

- ☑ Transit damage to product
- ☑ Box damage from product jostling in transit
- ☑ Unprofessional retail appearance
- ☑ Expensive and annoying innerpack: die cuts, peanuts, Styrofoam, etc.

Plus offers these added benefits

- ☑ Total moisture, dirt, and dust protection
- ☑ Tamper evident
- ☑ No mess. No fuss.

We think outside the box to protect what's inside your box®

My customers love that our products stay in place during shipment even across the country! It keeps the product looking fresh and it actually discourages pilferage of attached components.

-Paul Schuck, Undercar Express
